Distributor for

lampre

Coating steel with ideas

Experience

Lampre has been one of the world's leading specialists in metal coil coating since 1975.

Leadership

Lampre believes that ongoing reinvestment in new processes, technology and facilities is the way to ensure leadership in the pre-coated metals sector.

Our new Lampre Polska plant, which opened recently in Poland, has brought our facilities to seven, including our four plants in Italy and our Lampre Portuguesa and Lampre Benelux locations. Two recently established divisions—Lampre Turçelik, our Turkish service centre, and Lampre USA, our North American distribution hub—further enhance Lampre's ability to meet the needs of a fast-changing market. Lamital and Lamfer, our Italian service centres, round out our strategic customer service investments and help ensure customer satisfaction.

Innovation

Lampre has a comprehensive and constantly updated range of products with a wide range of technical features. With more than 500 coating alternatives available from our engineering affiliate Lamtech, there's a suitable solution for any need.

Research and Development

The Lampre R&D division is equipped with state-of-the-art equipment, which enables us to perform stringent testing and experiments on new steel coating technologies in order to select the safest and most effective coatings in the world. We also produce custom coatings to meet special customer needs, another major benefit of the Lampre system.

Support

Our expert sales team takes pride in helping customers find the best solutions. With sales managers in over 50 countries, we guarantee a fast and direct approach whenever there's a need for pre-coated steel.

Quality

Lampre is known worldwide for the superior quality of its products. Our innovative coating solutions together with our long experience make Lampre the benchmark for quality in the coil coating industry. Leading industry certifications and the highest service standards are the cornerstone of Lampre's success.

Future

Day in, day out, Lampre strives to make steel more versatile, more beautiful, and even more widely usable. Every Lampre product comes with an idea that gives more values to your ideas.

Distributor for Lampre

Since 1932

CBBC is a leading manufacturer of whiteboard and chalkboard surfaces and has been a proud distributor of Lampre products in Canada and the U.S. for over 15 years. With our cutting, rolling, and inventory management services all under one roof, we offer one-stop convenience. Over the past five years, we have expanded our storage and manufacturing space and added an automated cutting line. Our sales team boasts over 25 years' experience in the North American market.

With three cutting lines and a 60,000 sq. ft. (5,500 m²) warehouse, we can process orders quickly and easily.

The quality of our products and the expertise of our employees make CBBC the place to go for pre-coated steel.

Our Services at CBBC

Lamination

Over the years, CBBC has built a reputation for offering top-notch custom lamination services. Our team closely analyzes your project to determine the best solution (thickness and surfaces) to meet your requirements and expectations. CBBC is attentive to your needs and offers the best quality at the best price.

Cutting

With three cutting lines and a new automated line, CBBC can process orders quickly and easily, no matter what the required dimensions.

Inventory Management

CBBC expanded its storage and manufacturing space over the past five years. Inventory can be stored for up to 12 months in a 60,000 sq. ft. warehouse.

EXTERIOR CLADDING

Specialized collection for exterior cladding

The green solution for your cladding

- The steel substrate is totally chrome free (Cr6, Cr3)
- Does not contain halogens (chlorine, fluorine, bromine, astatine)
- 100% recyclable

Uncompromising perfection

- Postformable
- No bleaching or deformation during processing
- Exceptionally resistant to ultraviolet rays
- Highly resistant to chemical agents (alcohol, solvents, etc.)
- Very easy to maintain

Beautiful, Sturdy,
and Versatile!

Unlimited Applications

Whether you need to make siding, soffits, fascias, mouldings, or any other item, there's no limit to what Lamtop can do to meet your clients' most demanding challenges.

GARAGE DOORS

Beautiful and Long-Lasting

DL Series

The DL Series (wood collection) is the pinnacle of design. It reproduces elements of nature, creating abstract finishes for a wide range of styles. It's an ideal option for garage and steel doors (see next page) and for all decorative elements where you want to add a touch of elegance. And at nearly 200 microns, it's five times thicker than painted steel, for exceptional quality and greater strength.

STEEL DOORS

Interior

All our exclusive design finishes are available for interior doors.

Exterior

Opt for our specially treated wood finishes that make steel more resistant to ultraviolet rays and natural elements.

ARCHITECTURAL WALLS

Magnetic and Easy to Maintain

Our surfaces are available in sheets, rolls, and panels (with or without joints).

Choice of multiple finishes: wood, designer, textured, metallic, etc.

Visit our website at www.b2bcbbc.com to see our selection of finishes.

Our mechanical joint

Each panel has a mechanical joint, so you can mount as many as you want to make your walls as wide as you like. Joints are concealed under the steel to give your accent wall a seamless look.

Lampre steel surface

Whiteboard Walls

The magnetic white writing surface has no dividing moulding, so you can use every inch of your wall.

Textured-Finish Walls

Choose from our many design and texture options to add a decorative accent to your architectural walls.

MOVABLE WALLS

Integrate our decorative steel into your movable partitioning system. Choose from our different surfaces to create a unique and versatile high-end wall, including our magnetic writing surfaces.

METALWORK

Ceilings

Decorative Walls

Our steel is completely postformable and can easily be bent to your panel specifications.

Acoustic Walls

Our steel is ideal for microperforation and bending. The finish remains intact and will add a look of elegance to your panels.

Railings

FURNITURE

Laminite™ - Writing Surfaces

The steel in our Laminite collection is designed to provide a high quality, durable writing surface. Incorporate it into your furniture and provide clients with a handy magnetic writing surface that can also be used for posting.

Lockers

Build your lockers with our high quality postformable steel at an economical price. Your clients will love the faux wood and stainless steel finishes that enhance the look of your product.

Metal Housings

Shelving

Our steel is easy to transform, bend, and drill, making it simple to build high-end shelving with a decorative finish (wood, textured, marble) or shelves with an antibacterial finish for a specific use (Sanisteel collection). Our easy-care surfaces will add value to your final product.

COLD ROOMS

Rigid Foodgrade A Series

Rigid films, exempt from plasticisers and phthalates, provide outstanding surface resistance. They are suitable for food contact and have won numerous certificates for fire resistance. These thick coatings have proven their worth over the years, especially in heavy-wearing areas. They are a natural choice for panels, refrigerators, home appliances, and elevators.

LABORATORIES

sanisteel 

Our antibacterial Sanisteel collection is ideal for laboratories and work surfaces in the health, pharmaceutical, and food industries. Like our other collections, it's perfectly postformable and allows for great flexibility in processing. The Sanisteel collection also offers a non-slip floor surface with the same antibacterial properties (see p.21).

ELEVATORS

High Gloss Finish PPS Series

This product line features complex food-grade films with a high-gloss finish and is especially designed to give the product an attractive look without compromising on the mechanical characteristics typical of film coated Lampre Steel. Products are available in solid colours and abstract designs with both marble and stainless steel finishes. The PPS Series is particularly useful for household appliances, elevators, and refrigerators. Ease of cleaning and high resistance to detergents make the PPS Series an ideal choice in high-traffic areas.

SIGNAGE

Our interior and exterior finishes will enhance the image you want to offer to your clients.
